c. Everyone should be acquainted with the procedures for evacuating the building in case of a fire.

COMMITTEE REPORTS

25X1A [ ] Mensuration Committee, reported on a survey taken  
 25X1A of the PI's to determine how much they knew about running the [ ] and  
 25X1A [ ] comparators. It was decided that PI's just back from Offutt and  
 25X1A older PI's could profit by a course on the use of these comparators. The  
 25X1A committee has designed a 2 1/2-day course which will be given once a  
 month. The first running of the course was completed this week.

25X1A [ ] EDP Applications Group, reported that there was an  
 increase of over 1,000 jobs on the computer during the month of May.  
 The committee has written their objectives and established a guest speaker  
 program. Mr. Allen stated that in the future the Production Board should  
 review the committee's objectives before they are published.

25X1A [ ] Equipment Team, reported that the new light table order  
 is being modified to incorporate IAS specifications and that we will  
 receive a prototype by July.

25X1A [ ] reported that at the next EXRAND meeting [ ] will  
 25X1A brief on [ ] 25X1A

25X1A [ ] Unidentified Targets Group, summarized the ways NPIC  
 and IAS have handled unidentified's over the years. It was agreed to  
 abandon the semi-annual unidentified's report and in its place arrange  
 for someone to sit in on the recently established inter-Agency unidenti-  
 25X1A fied's group as an observer.

OLD BUSINESS

25X1A [ ] reported that [ ] was going to [ ] to survey  
 25X1A needs for setting up the new PI shop. [ ] also reported that  
 25X1A [ ] was assured that their requirements will be met. 25X1A

25X1A [ ] indicated that there is a possibility of ordering new PI  
 furniture out of next year's funds. This will cost [ ] for all of 25X1A  
 IAS.

25X1A [ ] was instructed to investigate the feasibility of IAS'  
 obtaining an Itek copier or one similar to it. He reported that PSS and  
 the Technical Advisor will contact the Visual Graphics Corporation which  
 produces a copier that is supposed to be better than the Itek, as well as  
 25X1A lower in cost. [ ] was also instructed to investigate the possi-  
 bility of obtaining one of NPIC's Itek copiers.

25X1D

NEW BUSINESS

25X1A

[redacted] commented on overdue projects. The number of overdue projects has risen from 43 percent to 60 percent in the last two weeks. Mr. Allen is anxious to find out if there is a serious problem in this area and to rectify it so that we can ensure our requirements are being met in a timely manner.

25X1A

[redacted] commented that the Mission Status Report is not adequate. It was agreed to include in future reports projected recovery dates on satellite missions as well as negative information.
